

CSH ITAB Recent Projects 2005-2009

CSH ITAB has the capacity to project manage complex projects across the sectors. This has included initiating projects in response to identified industry need and managing projects for individual organisation or government departments.

With a proven track record in delivering creative and innovative projects on budget and within time lines, CSH ITAB has broken new ground with many of its projects integrating training, assessment and quality assurance within organisations.

CSH ITAB has brought expertise in project management, program development, instructional design, assessment implementation and evaluative research design to oversee recent projects such as these represented below.
